

Start

Zerail®
Omalizumab

can be prescribed for adult patients with chronic rhinosinusitis with nasal polyps (CRSwNP) who remain uncontrolled despite appropriate medical treatment and sinus surgery or have contraindications to surgery, resistance to surgery, or poorly controlled asthma.

*Criteria

- Evidence of type 2 inflammation → Tissue eos $\geq 10/\text{hpf}$, OR blood eos ≥ 150 , OR total IgE ≥ 100
- Need for systemic corticosteroid or contraindication to systemic steroids → ≥ 2 courses per yr, OR long term (>3 months) low dose steroids
- Significantly impaired quality of life → SNOT-22 ≥ 40
- Significant loss of smell → Anosmic on smell test (score depending on test)
- Diagnosis of comorbid asthma → Asthma needing regular inhaled corticosteroids

Cut-off points

INCS: intra nasal corticosteroids, OCS: oral corticosteroids; ESS: endoscopic sinus surgery, eos: eosinophil, hpf: high power field ($\times 400$), SNOT-22: sino-nasal outcome test-22
